

To the FCC I am writing this because i am asking you to reject the NAB's petition 04-160. I pay for my XM satellite radio service , and i do so because it provides the kind of quality and variety that i passionately long for and the local channels can not provide the the quality or variety (regular radio) I think the NAB has no business telling me what i can or can not listen to on a radio that i pay a subscription for!!! Please make the National Association of Broadcasters leave my XM Radio Alone!
